

Bishal Kumar Jha

AI Engineer | Generative AI | Machine Learning

jhab8505@gmail.com | +91-8789279021 | Jain University , Bengaluru

About Me

AI and Full-Stack Developer with hands-on experience in Generative AI, Machine Learning, web development, and cloud technologies. Skilled in Python, React, Next.js, TypeScript, Node.js, AWS, RAG, and LLMs, with experience building real-world AI and full-stack applications.

Skills

- Generative AI & LLMs
- Machine Learning & NLP
- Full-Stack Development
- Cloud & Backend Engineering

Languages

English, Nepali, Hindi, Maithali, Bajika, Bhojpuri

Projects

Organizational AI – LLM Hallucination Reduction

- Developed a RAG-based LLM system for factual and reliable responses.
- Implemented discriminator-guided reinforcement learning.
- Built an automated Q&A data generation pipeline using Qwen 7B.
- Added Gradio/desktop interfaces, testing, and deployment support

GitHub Analytics Pro

- Developed a platform for GitHub developer analytics and insights.
- Implemented developer scoring, contribution tracking, and language analysis.
- Built a multi-profile comparison and benchmarking system.
- Used Python, Flask, PyGithub, SQLAlchemy, REST APIs, and Chart.js

AWS End-to-End Data Pipeline

- Built a serverless ETL pipeline for YouTube trending data.
- Used S3, AWS Glue, Lambda, Athena, and PySpark for data processing.
- Designed a raw → cleansed → analytics data architecture.
- Created Amazon QuickSight dashboards with automated daily workflows

Starboss Coffee – Café Web Platform (<https://starboss-cafe.vercel.app/>)

- Developed a modern responsive website for Starboss Coffee.
- Designed an engaging UI/UX for café customers.
- Implemented digital presentation of café information and offerings.
- Deployed the application on Vercel for public access

Education

Jain University , Bengaluru

2024 - Present

– Computer Science and Engineering (9.5/10 CGPA)

- Studied core Computer Science fundamentals.
- Developed skills in programming and software development.
- Explored AI, Machine Learning, and Generative AI.
- Applied knowledge through technical projects.

United Academy (3.58/4 GPA)

2021 - 2023

– Physics, Chemistry, Math, Biology

- Built strong academic fundamentals.
- Developed analytical and problem-solving skills.
- Strengthened communication and presentation skills.
- Participated in Robotics Association of Nepal Event.

Tulasi Mehar Memorial Secondary School

2017 - 2021

– Secondary School Education

- Built strong academic fundamentals.
- Developed the Gaming Skills.
- Improved communication and teamwork.
- Participated in academic activities and games.

Experience

– Marketing Intern — Jain Information Centre

2023 - 2024

- Assisted with marketing and promotional activities.
- Managed event planning and coordination.
- Prepared and organized event documentation.
- Supported content, communication, and outreach activities.

– Full Stack Intern - TeraByte Innovations pvt.ltd

June 6th - August 6th (2026)

- Integrated AI-powered chatbot functionality into web applications.
- Connected and integrated REST APIs for application features.
- Worked on frontend and backend development.
- Tested, debugged, and improved AI and API-based features.

Technical Skills

Languages: Python, Java, JavaScript, TypeScript, SQL

AI/ML: Generative AI, LLMs, RAG, Machine Learning, NLP, TensorFlow

Web: React, Next.js, Node.js, Flask, HTML, CSS

Cloud & Tools: AWS, PostgreSQL, Supabase, Git, GitHub, REST APIs
